Our office consists of 4 workstations, a server, and document imaging devices. We have been receiving prompt and reliable service from Computer Technical Services since at least 2003. It has always been a pleasure working with them. The high level of responsiveness has been greatly appreciated, especially during tax season. We began doing bookkeeping, income taxes, and accounting in 1993 and are continuing to grow. I can confidently recommend Computer Technical Services to anyone based on their quality of work.
